

LuBan: Make It BIG

➤ Point of contact

Lujie Chen luban3d@gmail.com

➤ Download LuBan

Windows version: Download LuBan.exe in Win 32 or Win 64 folder to your computer. There are optional language packages in sub-folders, such as de_DE, and es_ES. Copy a sub-folder and put it in the same parent folder on your computer that contains LuBan.exe. When selecting a language from LuBan menu “Help -> Language”, the user interface will change to that language. If a language package is not found, LuBan will remain in English.

de_DE: German

es_ES: Spanish

fr_FR: French

it_IT: Italian

ms_MY: Malay

pl_PL: Polish

pt_BR: Brazilian Portuguese

sl_SI: Slovenian

zh_CN: Simplified Chinese

zh_TW: Traditional Chinese

Mac version: Download LuBan.app.zip in Mac 64 folder to your computer. The language packages are embedded in LuBan app.

➤ Run LuBan

Windows version: Run LuBan.exe.

If LuBan can't start, it is most probably that a computer does not have Visual Studio redistribution package. Please install the package: vc_redist.x86.exe (Win32) or vc_redist.x64.exe (Win64) in vc_redist folder; then run LuBan again.

Mac version: Unzip LuBan.app.zip and run LuBan.

If LuBan can't start, it is most probably that a Mac is set to run apps downloaded from Apple store only. Please set “Allow apps downloaded from Anywhere to run on this Mac” in Security and Privacy, General setting.

On Linux, use Wine software to run any Windows program including LuBan.exe.

➤ **LuBan license**

LuBan has several license versions:

1. No license. A user can open and process data but cannot save data.
2. Timed license. Within a licensed period, for example 1 month, a user can do anything in LuBan. A licensed computer must have internet connection; otherwise, LuBan will run as an unlicensed version.
3. Permanent license: A user can do anything in LuBan and the licensed computer does not need internet connection.

To obtain a computer's license ID, run LuBan and go to "Help -> About"; there is a line of license ID. Copy the entire line, including braces and OS information, and send it using a web form at www.luban3d.com/license or email it to luban3d@gmail.com.

➤ **Upgrade**

Within a licensed period, all upgrades are free. To get an upgrade, download the latest LuBan and overwrite the old version. Re-licensing is not needed unless you want to change a computer to run LuBan.

➤ **Documentation**

Documentation is in the "Doc" folder. Begin with "LuBan Get started.pdf". It is a brief overview of main features of LuBan.

➤ **Technical support**

Technical support is available at LuBan Facebook group: <https://www.facebook.com/groups/1067858546711484>.
