

LuBan

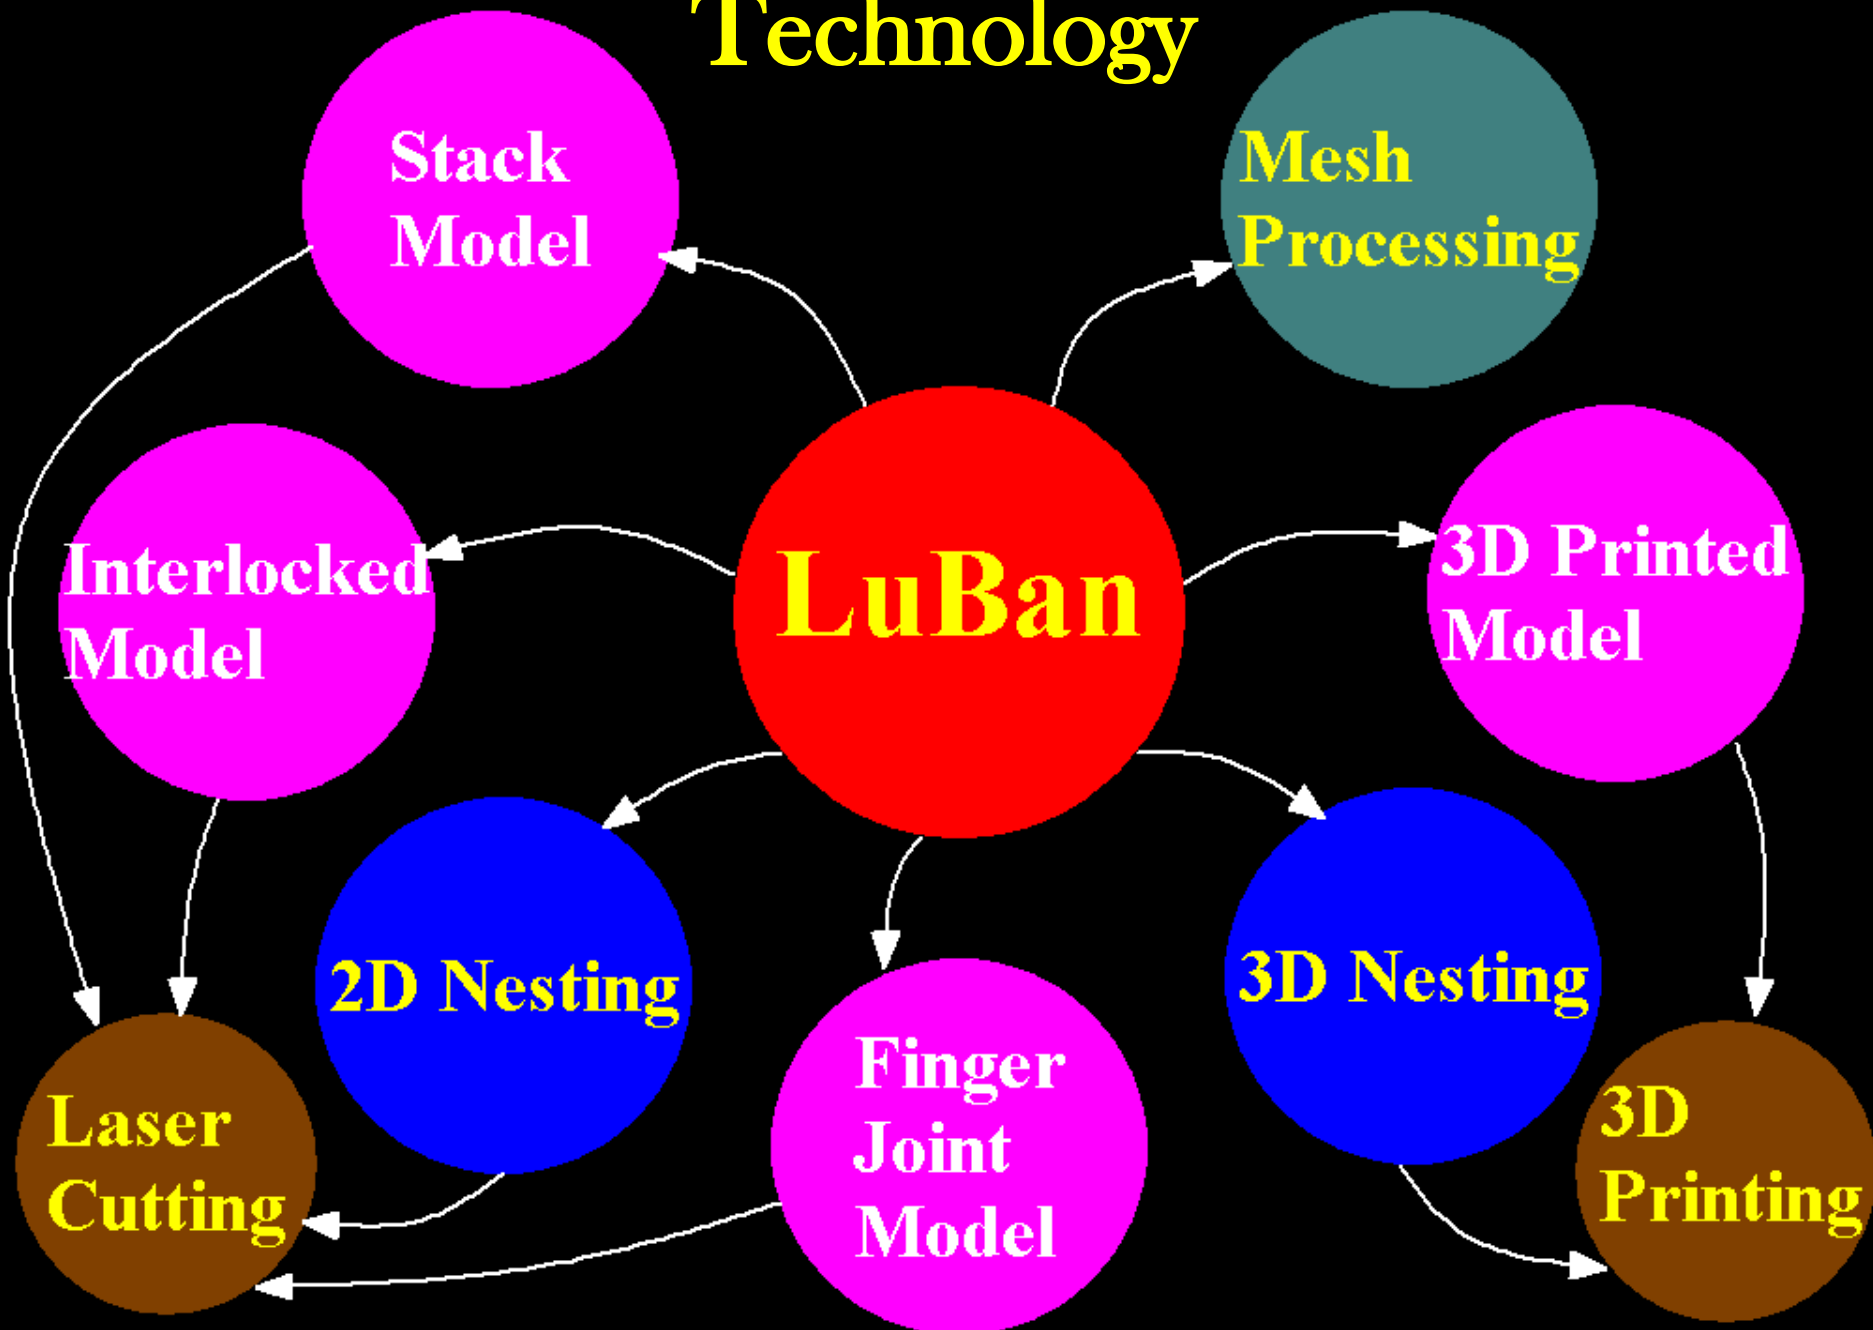

Introduction

Discovery

LuBan is next-generation, generative CAD/CAM software discovered at Massachusetts Institute of Technology (MIT) and developed at Singapore University of Technology and Design (SUTD) to help designers and makers improve physical production of their creations.

Technology

Application

CAD/CAM
Metal Cutting
(Ship building
& repair)

New Design Tool:
Generative Design

Advanced Manufacturing

Model making
(Architecture,
Education)

Mold making,
Formwork
(Construction)

Large-Scale
3D Printing
(Art, Museum)

Advantages

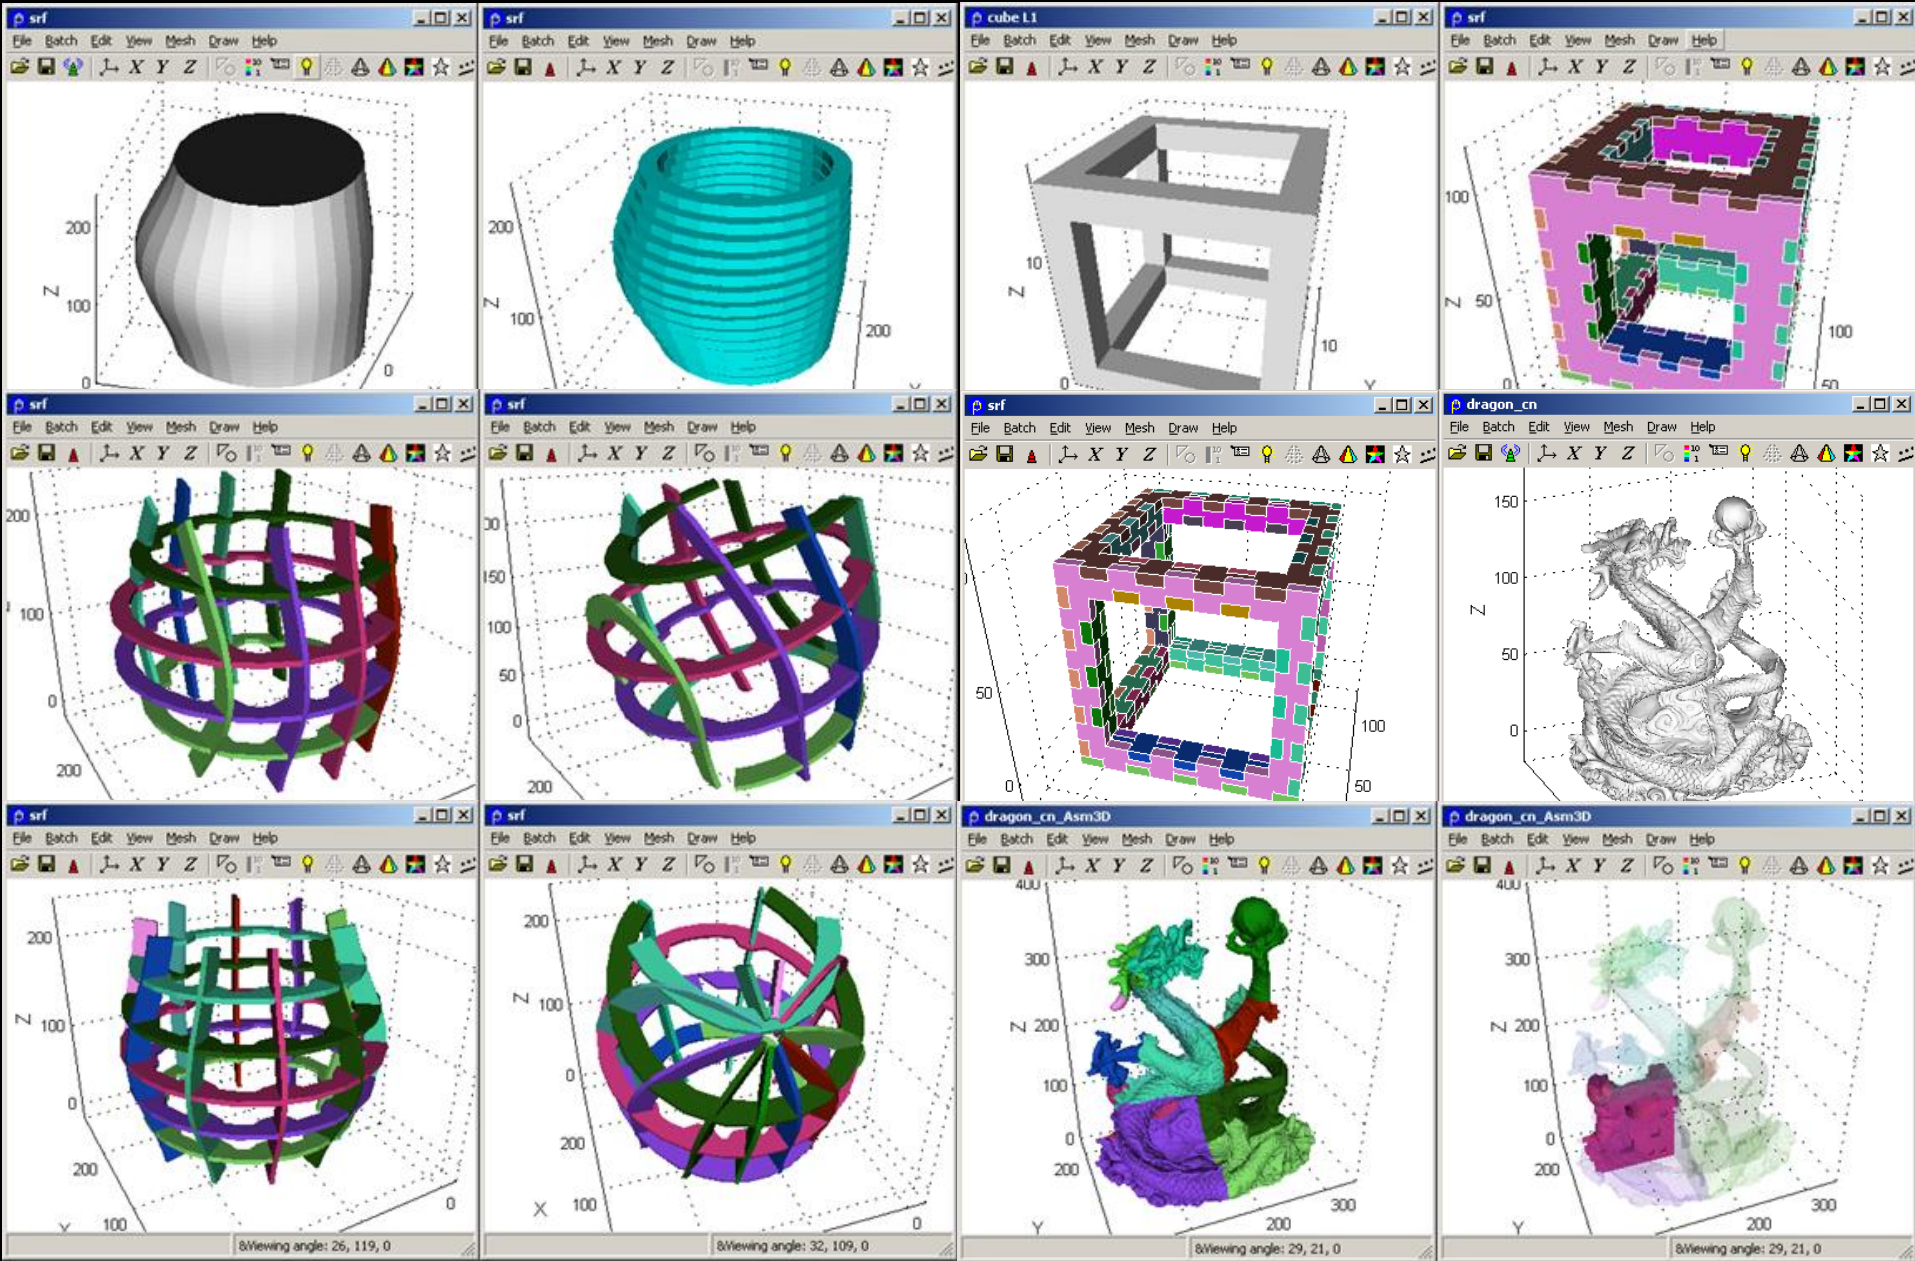

Automatic model generation

Large-scale rapid prototyping

User-friendly interface

C++ SDK library support

Summary

Case Study

Stack Model

1,200 layers
30,000 parts
3.6*1.8*1.6m

Case Study

Interlocked Model

Case Study

Finger Joint Model

Case Study

3D Printed Model

0.5m tall

1.0m tall

129 parts
